STAKKAbox™ ULTIMA Connect Provides Network Access for New Clean Water Supply in France

Agence Colas Villepreux

A new development of executive homes in Germain LOUVECIENNES in France saw the need for a new clean water supply network with network access.

The team at Colas worked with Cubis' French business development team to find the right network access chamber and cover system, that would work within the tight deadline and restricted site access.

Cubis' STAKKAbox™ ULTIMA Connect chamber system provided the ideal solution with a greater degree of flexibility compared to traditional chamber solutions such as concrete and brick during installation with the need for duct entry modification ability in-situ on-site. The 3700mm x 2000mm x 2000mm ULTIMA Connect chamber was delivered to site in 'flat pack' components due to the sites restricted accessibility and delivery constraints removing the need for heavy lifting equipment. The ULTIMA connect chamber system comprises of modular scalable components that are easily connectable. These components are also lightweight falling under 25kg making them suitable for a single person lift under manual handling regulations. The chamber system and C250 composite access cover were installed within 2 hours without the need for skilled wet trades reducing overall installation and transport costs through significant time savings.

Driven by Innovation

Innovation is the engine that has driven Cubis Systems to its position as global leader in the design and manufacture of access chambers and cable ducting systems.

Inspired by innovation, we have developed quality products that replace traditional construction materials like bricks and concrete. Our lightweight plastics, incorporating intelligent design features, are used in the construction of infrastructure networks for the rail, telecoms, water, construction and power markets worldwide. Cubis products can be installed much faster than traditional methods and therefore save our customers both time and money.

Cubis manufactures the preformed STAKKAbox™ network access chamber systems, the AX-S™ access covers range, a MULTIduct™ multiple duct system and the PROtrough cable troughing system at sites throughout the UK and Ireland. These innovative products are exported to more than 25 countries throughout the world.

At Cubis we are committed to ongoing innovation and dedicated to delivering absolute product quality, detailed technical customer support and the highest levels of customer satisfaction.
