Access Chamber System  
Provides Warehousing  
Fire Suppression  
System Solution

# STAKKAbox™ ULTIMA Connect Access Chamber System Provides Warehousing Fire Suppression System Solution

Distributor

Cubis Systems recently partnered with our France based distributor BUSCA, agency TRAPPES (78) to supply a network access chamber system for a new industrial warehousing fire suppression system.

Cubis' ULTIMA Connect chamber system provided the ideal solution with its reduced transport and install costs compared to traditional chamber solutions such as concrete and brick.

Onsite adjustability was of paramount importance for the multiple duct entry points needed to be drilled in-situ on-site. The 4000mm x 2500mm x 2500mm ULTIMA Connect chamber was delivered to site in 'flat pack' components due to the sites restricted accessibility and delivery constraints removing the need for heavy lifting equipment. Cubis' chamber accessories provided an access step system with hand rail for safe chamber entry and exit into the 2500mm deep chamber.

The STAKKAbox™ chamber system and C250 composite access covers were installed within 2½ hours without the need for skilled wet trades. Cubis' AX-S™ composite range of lightweight access covers come in a wide range of sizes and load ratings (A15, B125 and C250) set by EN124. Bespoke custom badging, Anti-slip tread pattern and locking options make them the ideal solution for a range network access systems.

## Driven by Innovation

Innovation is the engine that has driven Cubis Systems to its position as global leader in the design and manufacture of access chambers and cable ducting systems.

Inspired by innovation, we have developed quality products that replace traditional construction materials like bricks and concrete. Our lightweight plastics, incorporating intelligent design features, are used in the construction of infrastructure networks for the rail, telecoms, water, construction and power markets worldwide. Cubis products can be installed much faster than traditional methods and therefore save our customers both time and money.

Cubis manufactures the preformed STAKKAbox™ network access chamber systems, the AX-S™ access covers range, a MULTIduct™ multiple duct system and the PROtrough cable troughing system at sites throughout the UK and Ireland. These innovative products are exported to more than 25 countries throughout the world.

At Cubis we are committed to ongoing innovation and dedicated to delivering absolute product quality, detailed technical customer support and the highest levels of customer satisfaction.
