

CPD Learning

Cubis Systems

Cubis Systems is the global leader in the design and manufacture of network access chamber and cable ducting systems used in the construction of infrastructure networks for rail, telecoms, water, energy, highways, ports and airports.

We would be delighted to provide you and your colleagues with a CPD approved presentation at your offices or virtually to develop industry skills and knowledge for professional development.

What to expect when attending:

Delegates will discover what network access and cable protection is and entails for the construction sector. The presentation will guide delegates through what sectors network access and cable protection is used within and how innovative composite materials can provide greater safety, speed and cost benefits to the customer. This will be compared to traditional methods and techniques across a multitude of construction applications and sectors.

How to arrange:

Please visit our website, www.cubis-systems.com for more details.
