Standard (ULTIMA)

STAKKAbox™ ULTIMA offers a flexible access chamber system with no compromise on strength. Due to the design and the material used (GRP), ULTIMA should be used anywhere where sidewall loading is a concern, such as alongside highways or railway tracks.

Connect (ULTIMA)

ULTIMA Connect has been developed to offer greater flexibility in chamber sizes without compromising the strength of the standard ULTIMA system. Featuring the same twinwall, sectional design as the standard system sections however are built from combining multiple parts. As with ULTIMA, all parts are manufactured in GRP and sold as ring sections. All flat-pack requests require approval.

Modula

STAKKAbox™ Modula is a range of modular and structural preformed access chambers. The system provides contractors with a means of constructing access chambers quickly and inexpensively, whilst offering improved build quality, reduced defects and enhanced site safety performance.

Fortress

STAKKAbox™ Fortress is a range of modular and structural preformed access chambers. The Fortress system is moulded in HDPE and possesses excellent strength to weight properties. Each section is ribbed internally to improve loading performance.

JMF

STAKKAbox™ JMF is a range of modular and structural preformed access chambers, available in 102, 104 and 106 sizes. The JMF access chamber systems is designed specifically for use within the telecommunications market.
